# INDEX TO VOLUME XIV

Acetone, A comparative study of six different strains of the organism commonly concerned in large-scale production of butyl alcohol and, by the biological process..... 399
Agglutination test, A rapid method for the macroscopic..... 287
Alcohols and phenols, Further investigations of the relation between the chemical constitution and the germicidal activity of..... 259
Ammonia production, The relation between volatile acid and, during metabolism of *Clostridium putrefaciens*. Quantitative aspects of the metabolism of anaerobes. II..... 193
Anaerobe, An, isolated from dental caries..... 385
Anaerobes, Quantitative aspects of the metabolism of. I. Proteolysis by *Clostridium putrefaciens* compared with that of other anaerobes..... 181
——, Quantitative aspects of the metabolism of. II. The relation between volatile acid and ammonia production during metabolism of *Clostridium putrefaciens*..... 193
——, Quantitative aspects of the metabolism of. III. The volatile acids produced by *C. putrefaciens* in cooked meat medium..... 201
Anaerobic conditions, Simple method to produce..... 391
Apparatus, An, for motion photomicrography of the growth of bacteria..... 157

*B. aerogenes*, The fate of *B. coli* and, in sewage purification..... 55
*B. coli* and *B. aerogenes*, The fate of, in sewage purification..... 55
—— in milk, Gentian violet lactose pepton bile for the detection of..... 47
Bacteria, An apparatus for motion photomicrography of the growth of..... 157
——, The influence of carbon dioxide on..... 101
——, vinegar, Studies of certain non-pellicle-forming..... 1
Bacterial allergy, Further studies on. The antigen involved in pneumococcus allergy..... 301
—— cell, A practical method of culture from a single..... 441
—— cells, The diffusion products of, as influenced by the presence of various electrolytes..... 69
—— cells, The interpretation of changes in electrical resistance accompanying the death of..... 279
—— content of ice cream mix, The effect of gelatin on the..... 363
—— cultures, The nitrite test as applied to..... 377
—— spores, Differential staining as a criterion of the viability of..... 425
Bayne-Jones, Stanhope, and Tuttle, Clifton. An apparatus for motion photomicrography of the growth of bacteria..... 157
Butyl alcohol and acetone, A comparative study of six different strains of the organism commonly concerned in large-scale production of, by the biological process..... 399

*C. putrefaciens*, The volatile acids produced by, in cooked meat medium, Quantitative aspects of the metabolism of anaerobes. III..... 201
Carbon dioxide, The influence of, on bacteria..... 101
Cellulose destroyers, The China blue-aurin-cellulose medium for the physiological study of..... 395
China blue-, The, aurin-cellulose medium for the physiological study of cellulose destroyers..... 395
*Clostridium putrefaciens* (McBryde), A complete description of..... 175
—— ——, Proteolysis by, compared with that of other anaerobes. Quantitative aspects of the metabolism of anaerobes. I..... 181
—— ——, The relation between volatile acid and ammonia production during metabolism of. Quantitative aspects of the metabolism of anaerobes. II. 193
Color diffusion in endo agar..... 139
Comparative, A, study of six different strains of the organism commonly concerned in large-scale production of butyl alcohol and acetone by the biological process..... 399
Complete, A, description of *Clostridium putrefaciens* (McBryde)..... 175
Cooked meat medium, The volatile acids produced by *C. putrefaciens* in. Quantitative aspects of the metabolism of anaerobes. III..... 201
Correlation, The, of variation in dye sensitivity and Gram character in certain Gram-positive organisms..... 349
Cruickshank, George A. A method for the routine diagnosis of poultry diseases..... 435

Dental caries, An anaerobe isolated from..... 385
Devereux, Edward D., and Tanner, Fred W. Observations on the growth of yeasts in pure nutrient solutions..... 317
Differential staining as a criterion of the viability of bacterial spores..... 425
Diffusion, The, products of bacterial cells as influenced by the presence of various electrolytes..... 69
Dimensions, The, of dividing microörganisms..... 275
Drake, E. T., and Sturges, W. S. A complete description of *Clostridium putrefaciens* (McBryde)..... 175
Dye sensitivity, The correlation of variation in, and Gram character in certain Gram-positive organisms..... 349

Effect, The, of gelatin on the bacterial content of ice cream mix..... 363
Egg white, The relation of the hydrogen ion concentration of, to its germicidal action..... 17
Ehrenberg, Henry. Simple method to produce anaerobic conditions..... 391
Electrical resistance, The interpretation of changes in, accompanying the death of bacterial cells..... 279
Electrolytes, The diffusion products of bacterial cells as influenced by the presence of various..... 69
Endo agar, Color diffusion in..... 139

Fate, The, of *B. coli* and *B. aerogenes* in sewage purification..... 55
Fay, A. C., and Olson, N. E. The effect of gelatin on the bacterial content of ice cream mix..... 363

Filterable viruses. A critical review ..... 217
Further investigations of the relation between the chemical constitution and the germicidal activity of alcohols and phenols ..... 259
Further studies on bacterial allergy. The antigen involved in pneumococcus allergy ..... 301

Gelatin, The effect of, on the bacterial content of ice cream mix ..... 363
Gentian violet lactose pepton bile for the detection of *B. coli* in milk ..... 47
Genung, Elizabeth F., and Thompson, Lucy E. Color diffusion in endo agar. 139
Germicidal action, The relation of the hydrogen ion concentration of egg white to its ..... 17
Gram character, The correlation of variation in dye sensitivity and, in certain Gram-positive organisms ..... 349
Gram-positive organisms, The correlation of variation in dye sensitivity and Gram-character in certain ..... 349
Grinnell, Francis B., and Zinsser, Hans. Further studies on bacterial allergy. The antigen involved in pneumococcus allergy ..... 301

Heukelekian, H. The fate of *B. coli* and *B. aerogenes* in sewage purification .. 55
Hydrogen ion concentration of egg white to its germicidal action, The relation of the ..... 17

Ice cream mix, The effect of gelatin on the bacterial content of ..... 363
Influence, The, of carbon dioxide on bacteria ..... 101
Interpretation, The, of changes in electrical resistance accompanying the death of bacterial cells ..... 279

Jay, Philip. An anaerobe isolated from dental caries ..... 385

Kessler, Mildred Adams, and Swenarton, Joseph C. Gentian violet lactose pepton bile for the detection of *B. coli* in milk ..... 47

Lactose pepton bile, Gentian violet, for the detection of *B. coli* in milk ..... 47
Lange, Linda B. The dimensions of dividing microörganisms ..... 275

Matthewman, Helen Bird. Differential staining as a criterion of the viability of bacterial spores ..... 425
Method, A, for the routine diagnosis of poultry diseases ..... 435
Microörganisms, The dimensions of dividing ..... 275
——, Vitamin effects in the physiology of ..... 335
Milk, Gentian violet lactose pepton bile for the detection of *B. coli* in ..... 47

Neave, S. L., and Wallace, G. I. The nitrite test as applied to bacterial cultures ..... 377
Nitrite, The, test as applied to bacterial cultures ..... 377
Noble, Arlyle. A rapid method for the microscopic agglutination test ..... 287

Observations on the growth of yeasts in pure nutrient solutions ..... 317

Olson, N. E., and Fay, A. C. The effect of gelatin on the bacterial content of ice cream mix ..... 363

Paine, Sydney G. A practical method of culture from a single bacterial cell .. 441
Parsons, L. B., and Sturges, W. S. Quantitative aspects of the metabolism of anaerobes. I. Proteolysis by *Clostridium putrefaciens* compared with that of other anaerobes ..... 181
—— and ——. Quantitative aspects of the metabolism of anaerobes. II. The relation between volatile acid and ammonia production during metabolism of *Clostridium putrefaciens* ..... 193
—— and ——. Quantitative aspects of the metabolism of anaerobes. III. The volatile acids produced by *C. putrefaciens* in cooked meat medium ... 201
Photomicrography, An apparatus for motion, of the growth of bacteria ..... 157
Pneumococcus allergy, The antigen involved in. Further studies on bacterial allergy ..... 301
Poultry diseases, A method for the routine diagnosis of ..... 435
Practical, A, method of culture from a single bacterial cell ..... 441

Quantitative aspects of metabolism of anaerobes. I. Proteolysis by *Clostridium putrefaciens* compared with that of other anaerobes ..... 181
Quantitative aspects of the metabolism of anaerobes. II. The relation between volatile acid and ammonia production during metabolism of *Clostridium putrefaciens* ..... 193
Quantitative aspects of the metabolism of anaerobes. III. The volatile acids produced by *C. putrefaciens* in cooked meat medium ..... 201

Rapid, A, method for the macroscopic agglutination test ..... 287
Relation, The, of the hydrogen ion concentration of egg white to its germicidal action ..... 17
Rettger, Leo F., and Valley, George. The influence of carbon dioxide on bacteria ..... 101
—— and Weyer, Elliott R. A comparative study of six different strains of the organism commonly concerned in large-scale production of butyl alcohol and acetone by the biological process ..... 399
Rivers, T. M. Filterable viruses. A critical review ..... 217

Sanborn, J. R. The China blue-aurin-cellulose medium for the physiological study of cellulose destroyers ..... 395
Schaffer, J. M., and Tilley, F. W. Further investigation of the relation between the chemical constitution and the germicidal activity of alcohols and phenols ..... 259
Sewage purification, The fate of *B. coli* and *B. aerogenes* in ..... 55
Sharp, Paul Francis, and Whitaker, Randall. The relation of the hydrogen ion concentration of egg white to its germicidal action ..... 17
Shaughnessy, H. J., and Winslow, C.-E. A. The diffusion products of bacterial cells as influenced by the presence of various electrolytes ..... 69
Simple method to produce anaerobic conditions ..... 391
Stearn, Esther Wagner. The correlation of variation in dye sensitivity and Gram character in certain Gram-positive organisms ..... 349

Studies of certain non-pellicle-forming vinegar bacteria..... 1
Sturges, W. S., and Drake, E.T. A complete description of *Clostridium putrefaciens* (McBryde)..... 175
—— and Parsons, L. B. Quantitative aspects of the metabolism of anaerobes. I. Proteolysis of *Clostridium putrefaciens* compared with that of other anaerobes..... 181
—— and ——. Quantitative aspects of the metabolism of anaerobes. II. The relation between volatile acid and ammonia production during metabolism of *Clostridium putrefaciens*..... 193
—— and ——. Quantitative aspects of the metabolism of anaerobes. III. The volatile acids produced by *C. putrefaciens* in cooked meat medium... 201
Swenarton, Joseph C., and Kessler, Mildred Adams. Gentian violet lactose pepton bile for the detection of *B. coli* in milk..... 47

Tanner, Fred W., and Devereux, Edward D. Observations on the growth of yeasts in pure nutrient solutions..... 317
Thompson, Lucy E., and Genung, Elizabeth F. Color diffusion in endo agar. 139
Tilley, F. W., and Schaffer, J. M. Further investigations of the relation between the chemical constitution and the germicidal activity of alcohols and phenols..... 259
Tuttle, Clifton, and Bayne-Jones, Stanhope. An apparatus for motion photomicrography of the growth of bacteria..... 157

Valley, George, and Rettger, Leo F. The influence of carbon dioxide on bacteria..... 101
Vandecaveye, S. C. Studies of certain non-pellicle-forming vinegar bacteria. 1
Vinegar bacteria, Studies of certain non-pellicle-forming..... 1
Viruses, Filterable. A critical review..... 217
Vitamin effects in the physiology of microörganisms..... 335

Wallace, G. I., and Neave, S. L. The nitrite test as applied to bacterial cultures..... 377
Werkman, C. H. Vitamin effects in the physiology of microörganisms..... 335
Weyer, Elliott R., and Rettger, Leo F. A comparative study of six different strains of the organism commonly concerned in large-scale production of butyl alcohol and acetone by the biological process..... 399
Whitaker, Randall, and Sharp, Paul Francis. The relation of the hydrogen ion concentration of egg white to its germicidal action..... 17
Winslow, C.-E. A., and Shaughnessy, H. J. The diffusion products of bacterial cells as influenced by the presence of various electrolytes..... 69

Yeasts, Observations on the growth of, in pure nutrient solutions..... 317

Zinsser, Hans, and Grinnell, Francis B. Further studies on bacterial allergy. The antigen involved in pneumococcus allergy..... 301
Zoond, Alexander. The interpretation of changes in electrical resistance accompanying the death of bacterial cells..... 279
